

LX SERIES

TM9E HIGH EFFICIENCY SINGLE STAGE GAS FURNACES WITH X13 MOTOR

When it's cold outside, everyone wants to relax in a home that's warm and welcoming. That's why we created LX Series gas furnaces, so you can take it easy when it comes to all the things you want out of a home heating system. Things like dependable performance, energy efficiency and operating economy. As a result, there's no reason to feel left out in the cold. And because it's built by York – the industry leader in innovative design – you know your system won't be down when you want some down time.

AMAZINGLY SMALL, YET POWERFUL!

SAVES MONEY WHILE IT KEEPS YOU WARM

With a LX Series 95.5% AFUE gas-fired furnace, it's easy to cut heating costs up to 31% compared to most furnaces that are 20 years old. For instance, our hot surface ignition technology doesn't waste fuel like a standing pilot does. Self-cleaning inshot burners precisely regulate the fuel mixture to ensure efficient, quiet and clean operation. And, a 100% shut-off main gas valve will completely turn off all gas flow to assure your safety. Plus, the X13 motor uses 2 times less electricity than the standard multi-speed furnace blower and is ENERGY STAR® qualified.

DURABILITY IN EVERY DETAIL

The entire system is built to last. The hot surface ignition system is virtually maintenance-free. Our aluminized steel tubular heat exchangers are made to resist the corrosion and cracks which can develop in die-formed exchangers. And, the heavy-duty cabinet is made of pre-painted steel with an appliance-like finish which resists corrosion and fading.

YORK WARRANTY

When we build a product this good, we're happy to stand behind it. So, we back each LX™ furnace with an exceptional limited warranty on the heat exchanger, and a 10-year limited parts warranty on all other components. To be valid, the qualifying product must be registered on-line via www.upgproductregistration.com within 90 days of installation.

- Attractive appearance
- Tubular aluminized steel heat exchanger
- Compact 33-inch height
- High-efficiency air circulating motor
- Efficiency ratings up to 95.5% AFUE
